DESIGN OPTIONS

The design option suggestions to improve this energy rating may be additional to elements already in place. For example, the option to install 'Heavy Drapes and Pelmet' will take into account windows that already have Heavy Drapes and Pelmet installed. Insulation recommendations will take into account existing insulation values.

Some recommendations for improvement will not be practical in all circumstances. For example, if the dwelling is built on a concrete slab or the external walls are solid brick, it would not be possible to install insulation.

Rater Comments

MEASUREMENTS USED IN THIS ASSESSMENT

The Energy Rating recorded in this assessment is determined by assessing many elements of the structure and interior treatments including window and floor coverings. The area of external walls and windows, ceiling and floors are part of the assessment.

Some measurements used in this assessment may be nominal. Every effort is made by the assessor to accurately calculate the dimensions of property. However, often accurate and comprehensive plans indicating all dimensions of an existing property, particularly following alterations and extensions are not always available. The reader of this report should not rely on the accuracy of any dimensions used when making critical decisions relating to those dimensions. The assessor will not accept any liability should any discrepancy be revealed.

DESIGN OPTIONS

The design option suggestions to improve this energy rating may be additional to elements already in place. For example, the option to install 'Heavy Drapes and Pelmet's' will take into account windows that already have Heavy Drapes and Pelmet's installed. Insulation recommendations will take into account existing insulation values.

Some recommendations for improvement will not be practical in all circumstances. For example, if the dwelling is built on a concrete slab, it will be possible to install floor insulation.

DOOR SEALS AND WEATHER STRIPS

A wooden framed door is only considered to be sealed when a draft extruding device is fitted to the bottom of the door AND sealing tape or felt is fitting to the timber frame around the door opening.

WINDOW GLAZING RATIOS

Glazing areas in one direction greater than 25% of the net conditioned floor area will reduce the Energy Efficiency Rating.

Re: 77 Annabelle View, Coombs

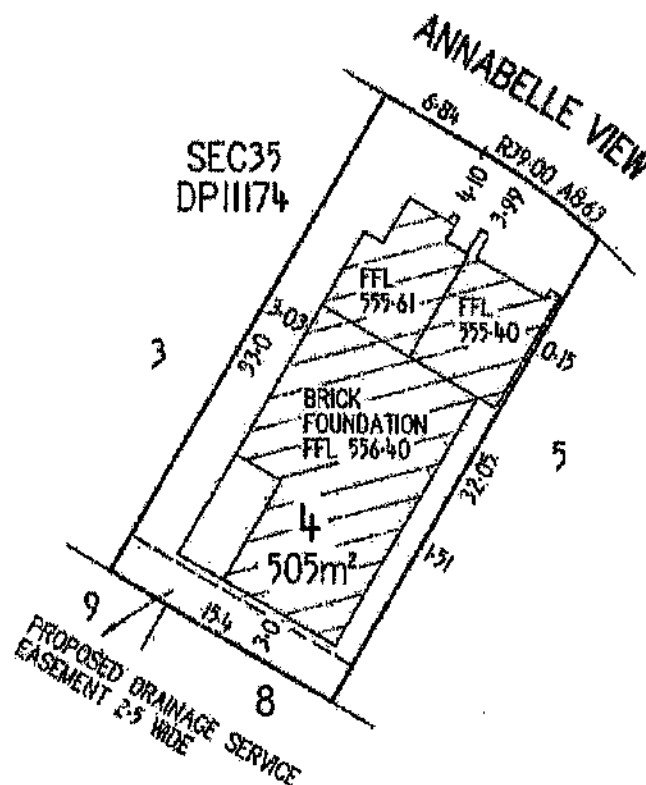

Dear Sir

As instructed, we have surveyed the land at Coombs, in the Division of Coombs, District of Molonglo Valley, having a total frontage of 15.47 metres to Annabelle View, being **Block 4 Section 35 Deposited Plan No. 11174** as shown in the sketch plan below.

Upon this land stands the brick foundation of a building in the course of erection to be on completion a cottage residence.

The sketch shows the position of the brick foundation relative to the boundaries and the level of the concrete slab on Australian Height Datum (A.H.D). The land is subject to a Proposed Drainage Service Easement 2.5 metres wide.

Other than as stated above, there are no apparent encroachments upon this land or by this property on adjoining lands or street.

Yours faithfully

Important Asbestos Advice for ACT homes built before 1985

Asbestos is hazardous but it can be managed safely.

Follow the three steps for managing materials containing asbestos (MCAs) in your home.

Step 1. Identify where MCAs may be in your home

When was your house built?

- If your house was built before 1985, the table below gives you an indication of where you are likely to find MCAs in your home. There is also a diagram on the back of this sheet showing where MCAs are commonly found.
- If your house was built after 1985, it is unlikely to contain MCAs.
- If in doubt, assume that materials DO contain asbestos.

Common locations of MCAs in ACT homes*

(Percentage (%) of properties sampled where asbestos was detected)

Location	Pre 1965	1965–1979	1980–1984	1985–now*
Eaves	86%	92%	40%	0%
Garage/shed	80%	70%	15%	0%
Bathroom	54%	75%	50%	0%
Laundry	75%	80%	50%	0%
Kitchen	52%	23%	15%	0%

*Results of 2005 Asbestos Survey of over 600 ACT Homes. *One MCA was found in a 1985 house supporting roof tiles on a gable end.

Step 2. Assess the risk

Visually check the condition of the MCA – is it cracked, broken, etc?

- If it's in good condition and left undisturbed, it does not pose a health risk.
- If you suspect it is not in good condition, arrange for appropriate maintenance or removal by a qualified person.

Step 3. Manage safely

Make sure you remember to:

- Keep an eye on MCAs to make sure they remain in good condition.
- Consider removal of the MCA by a qualified person, when renovating or doing home repairs.
- Inform tradespeople working on your home of the location of any possible MCAs.
- Engage a qualified person if you decide to obtain a professional asbestos report on MCAs in your home.

For further information or advice on managing asbestos or home renovations visit the asbestos website www.asbestos.act.gov.au or call 13 22 81.

Cooling Off Period

(for residential property only)

- 1 The Buyer may rescind this Contract at any time before 5pm on the 5th Business Day after the day this Contract is made except if any circumstance in paragraph 2 applies.

- 3 A Buyer exercising the cooling off right by rescinding this Contract forfeits 0.25% of the Price. The Seller is entitled to recover the amount forfeited from the Deposit and the Buyer is entitled to a refund of any balance.

Warnings

- 5 There are serious risks to a Buyer releasing the Deposit before Completion. The Buyer should take legal advice before agreeing to release the Deposit.
- 6 The Buyer should consider the application of the Territory Plan and other planning and heritage issues before signing this Contract.
- 7 If the Lease is a concessional lease then restrictions on transfer and other dealings may apply.
