### Preliminary

#### To the purchaser:

The purpose of a statement under section 7 of the *Land and Business (Sale and Conveyancing) Act 1994* is to put you on notice of certain particulars concerning the land to be acquired. If you intend to carry out building work on the land, change the use of the land or divide the land, you should make further inquiries to determine whether this will be permitted. For example, building work may not be permitted on land not connected to a sewerage system or common drainage scheme if the land is near a watercourse, dam, bore or the River Murray and Lakes.

The *Aboriginal Heritage Act 1988* protects any Aboriginal site or object on the land. Details of any such site or object may be sought from the "traditional owners" as defined in that Act.

If you desire additional information, it is up to you to make further inquiries as appropriate.

#### Instructions to the vendor for completing this statement:

☐ means the Part, Division, particulars or item may not be applicable.

If it is applicable, ensure the box is ticked and complete the Part, Division, particulars or item.

If it is not applicable, ensure the box is empty or strike out the Part, Division, particulars or item. Alternatively, the Part, Division, particulars or item may be omitted, but not in the case of an item or heading in the table of particulars in Division 1 of the Schedule that is required by the instructions at the head of that table to be retained as part of this statement.

\* means strike out or omit the option that is not applicable.

All questions must be answered with a YES or NO (inserted in the place indicated by a rectangle or square brackets below or to the side of the question).

If there is insufficient space to provide any particulars required, continue on attachments.

You may notify the vendor of your intention not to be bound by the contract for the sale of the land UNLESS–

- (a) you purchased by auction; or
- (b) you purchased on the same day as you, or some person on your behalf, bid at the auction of the land; or
- (c) you have, before signing the contract, received independent advice from a legal practitioner and the legal practitioner has signed a certificate in the prescribed form as to the giving of that advice; or
- (d) you are a body corporate and the land is not residential land; or
- (e) the contract is made by the exercise of an option to purchase not less than 5 clear business days after the grant of the option and not less than 2 clear business days after service of this form; or

- (g) the contract also provides for the sale of a business that is not a small business.

#### 2 – Time for service

The cooling-off notice must be served–

- (a) if this form is served on you before the making of the contract– before the end of the second clear business day after the day on which the contract was made; or
- (b) if this form is served on you after the making of the contract– before the end of the second clear business day from the day on which this form is served.

#### Note–

Section 5(3) of the *Land and Business (Sale and Conveyancing) Act 1994* places the onus of proving the giving of the cooling-off notice on the purchaser. It is therefore strongly recommended that –

- (a) if you intend to serve the notice by leaving it for the vendor's agent at the agent's address for service or an address nominated by the agent, you obtain an acknowledgment of service of the notice in writing; or
- (b) if you intend to serve the notice by fax or email, you obtain a record of the transmission of the fax or email.

#### 5 – Effect of service

If you serve such cooling-off notice on the vendor, the contract will be taken to have been rescinded at the time when the notice was served. You are then entitled to the return of any money you paid under the contract other than–

- (a) the amount of any deposit paid if the deposit did not exceed \$100; or
- (b) an amount paid for an option to purchase the land.

# **Proceeding with the purchase**

If you wish to proceed with the purchase—

- (a) it is strongly recommended that you take steps to make sure your interest in the property is adequately insured against loss or damage; and
- (b) pay particular attention to the provisions in the contract as to time of settlement - it is essential that the necessary arrangements are made to complete the purchase by the agreed date - if you do not do so, you may be in breach of the contract; and

*Land and Business (Sale and Conveyancing) Act 1994 section 13A*  
*Land and Business (Sale and Conveyancing) Regulations 2010 regulation 17*

Before you buy a home there are a number of things that you should investigate and consider. Though it may not be obvious at the time, there could be matters that may affect your enjoyment of the property, the safety of people on the property or the value of the property.

The following questions may help you to identify if a property is appropriate to purchase. In many cases the questions relate to a variety of laws and standards. These laws and standards change over time, so it is important to seek the most up to date information. Notices are printed under arrangement with organisations having some potential interest in the subject land. You should contact the identified party for further details.

### **Electricity and Telecommunications Infrastructure - Building Restrictions and Statutory Easements (including those related to gas, water and sewage)**

#### Building restrictions

It is an offence under section 86 of the *Electricity Act 1996* to erect a building or structure within a prescribed distance of aerial or underground powerlines. In some, but not all, cases approval may be obtained from the Technical Regulator. Generally, however, land owners must not build, or alter a building or structure, with the result that any part of the resulting building or structure is within the minimum clearance distance required from certain types of powerlines. These building limitations are set out in the *Electricity (General) Regulations 2012* regulations 81 and 82. Purchasers intending to redevelop the property to be purchased should therefore be aware that the restrictions under the *Electricity Act* and *Regulations* may affect how, or if, they are able to redevelop the property.

In addition, if a building or structure is erected in proximity to a powerline of an electricity entity in contravention of the *Electricity Act*, the entity may seek a court order:

- a) requiring the person to take specified action to remove or modify the building or structure within a specified period;
- b) for compensation from the person for loss or damage suffered in consequence of the contravention; and/or
- c) for costs reasonably incurred by the entity in relocating the powerline or carrying out other work.

Contact the Office of the Technical Regulator in DEM on 8226 5500 for further details.

#### Statutory easements

Statutory easements for purposes such as (and without limitation) electricity, telecommunications, gas, water and sewage, may also exist, but may not be registered or defined on the title for the land.

Separate from the above building restrictions, South Australia's electricity supply and transmission businesses have statutory easements over land where part of the electricity distribution or transmission system was on, above or under the land as at particular dates specified by legislation.

This notice does not necessarily imply that any statutory or other easement exists.

However, where in existence, statutory easements may provide these organisations and businesses (identified in the relevant legislation) with the right of entry, at any reasonable time, to operate, repair, examine, replace, modify or maintain their equipment, to bring any vehicles or equipment on the land for these purposes, and to install, operate and carry out work on any pipelines, electricity or telecommunications cables or equipment that may be incorporated in, or attached to, their equipment ( For example, see Clause 2 of Schedule 1 of the *Electricity Corporations (Restructuring and Disposal) Act 1999*; section 48A of the *Electricity Act 1996*).

For further clarification on these matters, please contact the relevant organisations or businesses, such as SA Power Networks' Easements Branch on telephone 8404 5897 or 8404 5894.

If you intend to excavate, develop or subdivide land, it is suggested that you first lodge a 'Dial Before you Dig' enquiry. Dial Before You Dig is a free referral service that provides information on the location of underground infrastructure. Using the Dial Before you Dig service (<https://1100.com.au>) may mitigate the risk of injury or expense resulting from inadvertent interference with, damage to, or requirement to relocate infrastructure.

#### ***Land Tax Act 1936 and Regulations thereunder***

Agents should note that the current owner will remain liable for any additional charge accruing due before the date of this certificate which may be assessed on the land and also that the purchaser is only protected in respect of the tax for the financial year for which this certificate is issued. If the change of ownership will not occur on or before the 30th June, another certificate should be sought in respect of the next financial year or requests for certificate should not be made until after 30th June.

#### ***Animal and Plant Control (Agriculture Protection and other purposes) Act 1986 and Regulations***

## 2. The Owner's Obligations

- 2.1 This Deed is conditional upon the Registrar General depositing a plan of division in the Lands Titles Registration Office pursuant to Section 223 1 e of the Real Property Act 1886 in essentially the same form as the Proposal Plan and the Council granting an effective development approval for the creation of the residential lots.
- 2.2 In respect of a residential lot, the Owners shall not undertake development of a kind described as complying in the Council Development Plan without the prior written consent of the Council unless such development meets the following criteria, where relevant:
- 2.2.1 To ensure a reasonable separation between dwellings and to minimise the potential for overshadowing of adjacent dwellings, the following boundary set-backs apply:
- (a) single-storey development, or single-storey components of a development, should be located no less than one metre from side (unless located on the boundary) and rear boundaries; and
  - (b) two-storey development, or two-storey components of a development, should be located no less than three metres from side and rear boundaries.
- 2.2.2 To allow maximum access to solar energy the minimum set-back of a dwelling from its northern boundary should be three metres, unless the building form does not permit a three metre set-back (as may be the case for semi-detached dwellings), in which case, a courtyard capable of containing a rectangle of six metres

by four metres should be provided immediately adjacent to that northern boundary.

A northern boundary is defined as any site boundary having a bearing of between 45 degrees and 135 degrees of true north and located at the northern extremity of the site.

2.2.3 Up to 15 metres of side walls of single-storey dwellings may be located on one side boundary of a site, provided that:

- (a) the side wall is not higher than 3.5 metres above natural ground level;
- (b) the gradient of the natural surface level of the site is less than 1-in-10 in any direction; and
- (c) the set-back to the other side boundary is a minimum of one metre.

2.2.4 Open-sided carports, verandahs and pergolas which require development approval may be located on one side boundary of a site, provided that the structure does not exceed three metres in height on the boundary.

2.2.5 Development should be designed to relate to the slope of the land, so that:

- (a) the amount of cutting and filling of the natural ground profile is minimised; and
- (b) the need for retaining walls is avoided, or the height of retaining walls is minimised.

2.2.6 Development should be designed to minimise energy use for heating, cooling and lighting through the application of an appropriate range of the following techniques:

- (a) use of windows to maximise absorption of heat from the sun in winter on north and east building surfaces;
- (b) use of deciduous trees, pergolas, verandahs and awnings to allow penetration of heat from the sun in winter yet provide shade in summer;
- (c) avoidance of large windows on south and west facing building surfaces, other than in buildings which can take advantage of views; and
- (d) avoidance of overshadowing of windows on the north and east faces of neighbouring buildings, and surfaces used for the collection of solar energy.

2.2.7 Development should be sited so that sunlight is available to the northern facade of the development and any adjacent existing

dwellings for at least two hours between 9:00am and 3:00pm on 21 June.

2.2.8 Development should be designed so that as much stormwater as possible is retained on the development site through the application of an appropriate range of the following techniques:

- (a) the collection of roof run-off in rainwater tanks;
- (b) the use of rainwater for domestic purposes;
- (c) the direction of roof run-off onto garden areas; and
- (d) the design of paved areas so that stormwater is directed onto garden areas.

2.2.9 Each dwelling should have provision for car parking on the site of the dwelling at the rate of not less than 0.5 spaces per bedroom (or room that may be used as a bedroom) plus 0.5 spaces per dwelling. Where a second car park is provided in a tandem arrangement on a driveway, then the driveway gradient should be not more than 1-in-10.

2.2.10 The frontage of a dwelling, other than the driveway area should be landscaped to the reasonable satisfaction of the Council within 6 months of the occupation of the dwelling. Landscaping may comprise a combination of vegetation and paved surfaces, however paving should not constitute more than half of the area between the site frontage and the forward-most building alignment of a dwelling. Driveway width should not exceed 50 percent of the frontage of the site.

2.2.11 Development should seek to preserve and maintain existing mature vegetation, and in particular, vegetation which provides a screening effect between sites shall only be removed or cut back to facilitate the establishment of buildings that otherwise comply with the terms of this Deed..

### 3. Miscellaneous Provisions

3.1 The Owners shall not grant any lease or licence easement or other right of any nature whatsoever which may give any person the right to possession or control or entry upon the Residential Superlots or residential lots upon any terms whatsoever unless such grant shall be expressed in writing and shall contain as an essential term thereof a covenant by the grantee not to do or omit to do or suffer or permit any other person to do or omit to do any act matter or thing upon the Residential Superlots or residential lots which would constitute a breach of the provisions of this Deed if such act matter or thing were done or omitted to be done by the Owners.

## 2. The Owner's Obligations

- 2.1 This Deed is conditional upon the Registrar General depositing a plan of division in the Lands Titles Registration Office pursuant to Section 223 1 e of the Real Property Act 1886 in essentially the same form as the Proposal Plan and the Council granting an effective development approval for the creation of the residential lots.
- 2.2 In respect of a residential lot, the Owners shall not undertake development of a kind described as complying in the Council Development Plan without the prior written consent of the Council unless such development meets the following criteria, where relevant:
- 2.2.1 To ensure a reasonable separation between dwellings and to minimise the potential for overshadowing of adjacent dwellings, the following boundary set-backs apply:
- (a) single-storey development, or single-storey components of a development, should be located no less than one metre from side (unless located on the boundary) and rear boundaries; and
  - (b) two-storey development, or two-storey components of a development, should be located no less than three metres from side and rear boundaries.
- 2.2.2 To allow maximum access to solar energy the minimum set-back of a dwelling from its northern boundary should be three metres, unless the building form does not permit a three metre set-back (as may be the case for semi-detached dwellings), in which case, a courtyard capable of containing a rectangle of six metres

by four metres should be provided immediately adjacent to that northern boundary.

A northern boundary is defined as any site boundary having a bearing of between 45 degrees and 135 degrees of true north and located at the northern extremity of the site.

2.2.3 Up to 15 metres of side walls of single-storey dwellings may be located on one side boundary of a site, provided that:

- (a) the side wall is not higher than 3.5 metres above natural ground level;
- (b) the gradient of the natural surface level of the site is less than 1-in-10 in any direction; and
- (c) the set-back to the other side boundary is a minimum of one metre.

2.2.4 Open-sided carports, verandahs and pergolas which require development approval may be located on one side boundary of a site, provided that the structure does not exceed three metres in height on the boundary.

2.2.5 Development should be designed to relate to the slope of the land, so that:

- (a) the amount of cutting and filling of the natural ground profile is minimised; and
- (b) the need for retaining walls is avoided, or the height of retaining walls is minimised.

2.2.6 Development should be designed to minimise energy use for heating, cooling and lighting through the application of an appropriate range of the following techniques:

- (a) use of windows to maximise absorption of heat from the sun in winter on north and east building surfaces;
- (b) use of deciduous trees, pergolas, verandahs and awnings to allow penetration of heat from the sun in winter yet provide shade in summer;
- (c) avoidance of large windows on south and west facing building surfaces, other than in buildings which can take advantage of views; and
- (d) avoidance of overshadowing of windows on the north and east faces of neighbouring buildings, and surfaces used for the collection of solar energy.

2.2.7 Development should be sited so that sunlight is available to the northern facade of the development and any adjacent existing

dwellings for at least two hours between 9:00am and 3:00pm on 21 June.

2.2.8 Development should be designed so that as much stormwater as possible is retained on the development site through the application of an appropriate range of the following techniques:

- (a) the collection of roof run-off in rainwater tanks;
- (b) the use of rainwater for domestic purposes;
- (c) the direction of roof run-off onto garden areas; and
- (d) the design of paved areas so that stormwater is directed onto garden areas.

2.2.9 Each dwelling should have provision for car parking on the site of the dwelling at the rate of not less than 0.5 spaces per bedroom (or room that may be used as a bedroom) plus 0.5 spaces per dwelling. Where a second car park is provided in a tandem arrangement on a driveway, then the driveway gradient should be not more than 1-in-10.

2.2.10 The frontage of a dwelling, other than the driveway area should be landscaped to the reasonable satisfaction of the Council within 6 months of the occupation of the dwelling. Landscaping may comprise a combination of vegetation and paved surfaces, however paving should not constitute more than half of the area between the site frontage and the forward-most building alignment of a dwelling. Driveway width should not exceed 50 percent of the frontage of the site.

2.2.11 Development should seek to preserve and maintain existing mature vegetation, and in particular, vegetation which provides a screening effect between sites shall only be removed or cut back to facilitate the establishment of buildings that otherwise comply with the terms of this Deed..

### 3. Miscellaneous Provisions

3.1 The Owners shall not grant any lease or licence easement or other right of any nature whatsoever which may give any person the right to possession or control or entry upon the Residential Superlots or residential lots upon any terms whatsoever unless such grant shall be expressed in writing and shall contain as an essential term thereof a covenant by the grantee not to do or omit to do or suffer or permit any other person to do or omit to do any act matter or thing upon the Residential Superlots or residential lots which would constitute a breach of the provisions of this Deed if such act matter or thing were done or omitted to be done by the Owners.

- 3.4 If in a notice referred to in Clause 3.3 hereon the Council requires the removal of a building or structure from the Residential Superlots or residential lots the Council and its servants or agents are hereby authorised and empowered by the Owners to enter and remove the building or structure from the Residential Superlots or residential lots and to dispose of it in any manner determined by the Council provided that if the building or structure shall have any monetary value then the Council shall use its best endeavours to realise that monetary value and shall after the disposal account to the Owners and pay to them the realised value less all expenses incurred.
- 3.5 This Deed may not be varied except by a supplementary deed signed by the Council and the Owners.
- 3.6 The Council may waive compliance by the Owners with the whole or any part of the obligations on the Owners' part herein contained provided that no such waiver shall be effective unless expressed in writing and signed by the Council.
- 3.7 This Deed contains the whole agreement between the parties in respect of the matters referred to herein.
- 3.8 Notice shall for the purposes of this Deed be properly served on the Owners if it is:

- 3.11 The requirements of this Deed are at all times to be construed as additional to the requirements of the Development Act, 1993 and any other legislation affecting the subject land.
- 3.12 Each party shall do and execute all such acts documents and things as shall be necessary to ensure that this Deed is noted against the Certificates of Title for the Residential Superlots pursuant to the provisions of Section 57(5) of the Development Act 1993 in priority to any other registrable interest in the subject land save and except for the estate and interest of the Owner therein.
- 3.13 If the development approvals proposed to be granted by the Council with respect to the Proposal Plan or the residential lots cease to operate pursuant to Section 40(2) of the Act or are cancelled pursuant to Section 43 of the Act then in either event the Council shall upon the request of the Owner and at the cost of the Owner in all things execute and lodge with the Registrar-General an application to rescind this Deed.

Does the council hold details of any development approvals relating to:

- a) commercial or industrial activity at the land; or
- b) a change in the use of the land or part of the land (within the meaning of the repealed Development Act 1993 or the Planning, Development and Infrastructure Act 2016)?

**No**

Description of the nature of the development(s) approved:

*Note—*

*The question relates to information that the council for the area in which the land is situated may hold. If the council answers "YES" to the question, it will provide a description of the nature of each development approved in respect of the land. The purchaser may then obtain further details from the council (on payment of any fee fixed by the council). However, it is expected that the ability to supply further details will vary considerably between councils.*

*A "YES" answer to paragraph (a) of the question may indicate that a potentially contaminating activity has taken place at the land (see sections 103C and 103H of the Environment Protection Act 1993) and that assessments or remediation of the land may be required at some future time.*

*It should be noted that—*

- *the approval of development by a council does not necessarily mean that the development has taken place;*
  - *the council will not necessarily be able to provide a complete history of all such development that has taken place at the land.*
- 

The information herein is provided pursuant to the Council's obligations under Section 7 of the Land Business (Sales Conveyancing) Act 1994.

Only that information which is required to be provided has been given and that information should not be taken as a representation as to whether or not any other charges or encumbrances affect the subject land.

I, Kellie Parker, Administration Officer of the City of Marion certify that the information provided in these responses is correct.

CLASSIFICATION:	1a & 10a
DEVELOPMENT NO:	100/874/2016

**CONDITION(S)**

1..The engineer shall inspect and certify that the footings have been founded on a suitable foundation for the proposed construction prior to the placement of reinforcement.

BCA-P2.1

**Notes**

The certified drawings/ documents will be issued by the Council with the notification of development approval.

The person proposing to undertake building work (or who is in charge of such work) is warned of their obligation to give the Council notice at stages prescribed in Regulation 74. These include 1 business days notice of -:

- intended commencement of building work. Notice must include information on the persons who are proposed to sign the Regulation 83AB Statement of Compliance (where applicable),
- completion of all roof framing, Notice must be accompanied within 1 business day by a completed registered building work supervisors checklist relating to the roof framing and the subject roof framing must not be concealed for 2 business days,
- completion of building work, and
- other stages specified by Council

Regulation 83AB requires a Statement of Compliance for Class 1a buildings to be provided upon completion to the relevant authority by

- the licensed building work contractor who has carried out the relevant work, or who was in charge of carrying out the relevant work to which the statement relates, or
- if there is no such licensed building work contractor, such as where the relevant work is to be carried out by an owner builder, by a registered building work supervisor or private certifier in accordance with the attached pro-forma, which must also be signed by the owner of the relevant land, or by someone acting on his or her behalf.

A person must not occupy a Class 1a building under the Building Code (or an addition to a Class 1a building) that has been completed in accordance with the development authorisation insofar as it relates to the performance of building work unless it complies with the requirements prescribed in Regulation 83A.

This consent is issued on the understanding that the proprietary type materials and products as specified either on the architectural plans or specification are to be selected and installed in accordance with the manufacturers recommendations and relevant standards

Set-off dimensions shall be from the allotment boundaries and not necessarily the fence lines.

No portion of the building or structure (including footings and drainage) shall extend over the property boundary. A boundary survey by a licensed land surveyor is recommended when building to the boundary.

For building work prescribed in regulation 75, the building owner must, at least 28 days before the building work is commenced, cause to be served on the owner of the affected land or premises a notice of intention to perform the building work and the nature of that work, as required by Section 60.

The building levels and the location, design and capacity of the stormwater discharge at the property alignment should be approved by council prior to siteworks commencing. The drainage system should be completed by the finish of construction of the building. (Clause 5.5.3 of AS 2870)

The method of stormwater disposal must not result in the entry of water into any building or on to the land of any adjoining owner.

A sealed stormwater system will require inspection points at strategic locations to allow for ease of ongoing maintenance. The location and design of the points should be discussed with the design engineer to ensure maximum efficiency.

The required rainwater tanks to be plumbed into the dwelling in accordance with AS3500 must be provided with an overflow device connected into the stormwater disposal system and mosquito proof, non-degradable screens on the inlet and overflow. Supporting structures must be a proprietary product and / or comply with relevant Australian Standards.

AS3660.1- 'Termite Management - New Building Work', sets out methods for minimising the risk to new buildings from damage to their structural members by subterranean termites by deterring concealed entry by termites from the soil to the building. A termite barrier system constructed in accordance with this standard can not prevent termite attack, as barriers may be bridged or breached. Where termites bridge barriers the evidence may be detected during inspections which need to be carried out at intervals not exceeding 12 months to reduce the risk of termite damage. A durable notice shall be permanently fixed to the building in a prominent location such as a meter box or the like indicating the method of protection; and the date of installation of the system; and where a chemical barrier is used, its life expectancy as listed on the National Registration Authority label; and the need to maintain and inspect the system on a regular basis. The owner may also wish to seek advice regarding the potential for attack by termites to non-primary structural elements of the building and the precautions available.

Building work adjacent to a property boundary is proposed and this may compromise the effectiveness of the termite barrier. Documentation on the limitations of the termite barrier installed in this regard should be provided to the building owner.

The assessment of the timber framing has been based on the understanding that the timber to be used for all structural elements has a minimum joint strength group of J4 or JD4.

The footings have not been designed to take into account the effect of planted trees located within a distance less than their zone of influence from the building whether they are on or outside of the allotment. If clarification is required, refer to the footing construction report or seek advice from the engineer.

The owner's attention should be drawn to Appendix B of AS 2870 'Performance Requirements and Foundation Maintenance'.

Particular care should be exercised to ensure that the plumbing and perimeter paving is installed in accordance with the requirements of AS 2870 and engineer's details.

The articulation or control joints in the masonry walls shall be installed in accordance with the Site Investigation and Footing Construction Report

The site classification is E, the height of a D P C must be not less than 75 mm above the finished paving level or 50mm above a finished paving area that slopes away from the wall and is protected from the direct effect of the weather by a carport, verandah or the like

All glazing shall be glazed in accordance with AS1288- 2006, including safety glass for full height windows, glazed doors, side panels and windows located over or adjacent to a bath/shower

Flexible ductwork used for the transfer of products initiating from a heat source that contains a flame must comply with the fire hazard properties set out in AS4254.

Heating appliances shall be installed in accordance with Part 3.7.3 of the BCA.

This report does not imply compliance with the Electricity Act, 1996 as amended or the regulations thereunder (including Regulations prescribed for purposes of Section 86) or the Occupational Health, Safety & Welfare Act 1986 or the regulations thereunder. It is the responsibility of the applicant, owner and the person erecting the building to ensure compliance with same.

## CERTIFICATE OF LAND TAX PAYABLE

PAYMENT REMITTANCE ADVICE

**No payment is required on this Certificate**

**Please Note:**

Please check that the property details shown on this Certificate are correct for the land being sold.

This Certificate is only valid for the financial year shown.

If the change of ownership will occur in the following financial year, you must obtain another Certificate after 30 June.

Payment should be made as part of the settlement process.

The amount payable on this Certificate must be paid in full even if only a portion of the subject land is being sold. RevenueSA cannot apportion the land tax.

If the amount payable is not paid in full on or before the due date shown on this Certificate, the purchaser will not be released from liability of the whole amount of the land tax outstanding as at the date of settlement.

The owner of the land as at midnight on 30 June immediately before the financial year of this Certificate will remain liable for any additional land tax accrued before the date of this Certificate, even if the amount payable on this Certificate has been paid.

The amount payable on this Certificate is the land tax payable at the date of issue. However, land tax for a particular financial year may be reassessed at any time, changing the amount payable.

Should a reassessment occur after this Certificate has been paid in full, the purchaser will remain indemnified and will not be responsible for payment of the new land tax payable amount. The owner at the beginning of the relevant financial year will be responsible for payment of any additional land tax payable.

Should a reassessment occur after this Certificate has been issued but not paid in full, the purchaser will not be indemnified and may become responsible for payment of the new land tax payable amount.

Should a reassessment occur after this Certificate has been paid in full and the Certificate is subsequently updated, the purchaser will not be indemnified and may become responsible for payment of the new land tax payable amount.

Provision of this Certificate does not relieve the land owner of their responsibility to pay their Notice of Land Tax Assessment by the due date.
