Electricity and Telecommunications Infrastructure - Building Restrictions and Statutory Easements (including those related to gas, water and sewage)

Building restrictions

It is an offence under section 86 of the *Electricity Act 1996* to erect a building or structure within a prescribed distance of aerial or underground powerlines. In some, but not all, cases approval may be obtained from the Technical Regulator. Generally, however, land owners must not build, or alter a building or structure, with the result that any part of the resulting building or structure is within the minimum clearance distance required from certain types of powerlines. These building limitations are set out in the *Electricity (General) Regulations 2012* regulations 81 and 82. Purchasers intending to redevelop the property to be purchased should therefore be aware that the restrictions under the *Electricity Act* and *Regulations* may affect how, or if, they are able to redevelop the property.

In addition, if a building or structure is erected in proximity to a powerline of an electricity entity in contravention of the *Electricity Act*, the entity may seek a court order:

- a) requiring the person to take specified action to remove or modify the building or structure within a specified period;
- b) for compensation from the person for loss or damage suffered in consequence of the contravention; and/or
- c) for costs reasonably incurred by the entity in relocating the powerline or carrying out other work.

Contact the Office of the Technical Regulator in DEM on 8226 5500 for further details.

Statutory easements

Statutory easements for purposes such as (and without limitation) electricity, telecommunications, gas, water and sewage, may also exist, but may not be registered or defined on the title for the land.

Separate from the above building restrictions, South Australia's electricity supply and transmission businesses have statutory easements over land where part of the electricity distribution or transmission system was on, above or under the land as at particular dates specified by legislation.

This notice does not necessarily imply that any statutory or other easement exists.

However, where in existence, statutory easements may provide these organisations and businesses (identified in the relevant legislation) with the right of entry, at any reasonable time, to operate, repair, examine, replace, modify or maintain their equipment, to bring any vehicles or equipment on the land for these purposes, and to install, operate and carry out work on any pipelines, electricity or telecommunications cables or equipment that may be incorporated in, or attached to, their equipment (For example, see Clause 2 of Schedule 1 of the *Electricity Corporations (Restructuring and Disposal) Act 1999*; section 48A of the *Electricity Act 1996*).

For further clarification on these matters, please contact the relevant organisations or businesses, such as SA Power Networks' Easements Branch on telephone 8404 5897 or 8404 5894.

If you intend to excavate, develop or subdivide land, it is suggested that you first lodge a 'Dial Before you Dig' enquiry. Dial Before You Dig is a free referral service that provides information on the location of underground infrastructure. Using the Dial Before you Dig service (<https://1100.com.au>) may mitigate the risk of injury or expense resulting from inadvertent interference with, damage to, or requirement to relocate infrastructure.

Land Tax Act 1936 and Regulations thereunder

Agents should note that the current owner will remain liable for any additional charge accruing due before the date of this certificate which may be assessed on the land and also that the purchaser is only protected in respect of the tax for the financial year for which this certificate is issued. If the change of ownership will not occur on or before the 30th June, another certificate should be sought in respect of the next financial year or requests for certificate should not be made until after 30th June.

Animal and Plant Control (Agriculture Protection and other purposes) Act 1986 and Regulations

Agents should note that this legislation imposes a responsibility on a landholder to control and keep controlled proclaimed plants and particular classes of animals on a property.

Information should be obtained from:

- The vendor about the known presence of proclaimed plants or animals on the property including details which the vendor can obtain from records held by the local animal and plant control board
- The local animal and plant control board or the Animal and Plant Control Commission on the policies and priorities relating to the control of any serious proclaimed plants or animals in the area where the property is located.

Landscape South Australia 2019

Water Resources Management - Taking of underground water

Under the provisions of the *Landscape South Australia Act 2019*, if you intend to utilise underground water on the land subject to this enquiry the following apply:

2. The Owner's Obligations

- 2.1 This Deed is conditional upon the Registrar General depositing a plan of division in the Lands Titles Registration Office pursuant to Section 223 I e of the Real Property Act 1886 in essentially the same form as the Proposal Plan and the Council granting an effective development approval for the creation of the residential lots.
- 2.2 In respect of a residential lot, the Owners shall not undertake development of a kind described as complying in the Council Development Plan without the prior written consent of the Council unless such development meets the following criteria, where relevant:
- 2.2.1 To ensure a reasonable separation between dwellings and to minimise the potential for overshadowing of adjacent dwellings, the following boundary set-backs apply:
- (a) single-storey development, or single-storey components of a development, should be located no less than one metre from side (unless located on the boundary) and rear boundaries; and
 - (b) two-storey development, or two-storey components of a development, should be located no less than three metres from side and rear boundaries.
- 2.2.2 To allow maximum access to solar energy the minimum set-back of a dwelling from its northern boundary should be three metres, unless the building form does not permit a three metre set-back (as may be the case for semi-detached dwellings), in which case, a courtyard capable of containing a rectangle of six metres

by four metres should be provided immediately adjacent to that northern boundary.

A northern boundary is defined as any site boundary having a bearing of between 45 degrees and 135 degrees of true north and located at the northern extremity of the site.

2.2.3 Up to 15 metres of side walls of single-storey dwellings may be located on one side boundary of a site, provided that:

- (a) the side wall is not higher than 3.5 metres above natural ground level;
- (b) the gradient of the natural surface level of the site is less than 1-in-10 in any direction; and
- (c) the set-back to the other side boundary is a minimum of one metre.

2.2.4 Open-sided carports, verandahs and pergolas which require development approval may be located on one side boundary of a site, provided that the structure does not exceed three metres in height on the boundary.

2.2.5 Development should be designed to relate to the slope of the land, so that:

- (a) the amount of cutting and filling of the natural ground profile is minimised; and
- (b) the need for retaining walls is avoided, or the height of retaining walls is minimised.

2.2.6 Development should be designed to minimise energy use for heating, cooling and lighting through the application of an appropriate range of the following techniques:

- (a) use of windows to maximise absorption of heat from the sun in winter on north and east building surfaces;
- (b) use of deciduous trees, pergolas, verandahs and awnings to allow penetration of heat from the sun in winter yet provide shade in summer;
- (c) avoidance of large windows on south and west facing building surfaces, other than in buildings which can take advantage of views: and
- (d) avoidance of overshadowing of windows on the north and east faces of neighbouring buildings, and surfaces used for the collection of solar energy.

2.2.7 Development should be sited so that sunlight is available to the northern facade of the development and any adjacent existing

dwellings for at least two hours between 9:00am and 3:00pm on 21 June.

2.2.8 Development should be designed so that as much stormwater as possible is retained on the development site through the application of an appropriate range of the following techniques:

- (a) the collection of roof run-off in rainwater tanks;
- (b) the use of rainwater for domestic purposes;
- (c) the direction of roof run-off onto garden areas; and
- (d) the design of paved areas so that stormwater is directed onto garden areas.

2.2.9 Each dwelling should have provision for car parking on the site of the dwelling at the rate of not less than 0.5 spaces per bedroom (or room that may be used as a bedroom) plus 0.5 spaces per dwelling. Where a second car park is provided in a tandem arrangement on a driveway, then the driveway gradient should be not more than 1-in-10.

2.2.10 The frontage of a dwelling, other than the driveway area should be landscaped to the reasonable satisfaction of the Council within 6 months of the occupation of the dwelling. Landscaping may comprise a combination of vegetation and paved surfaces, however paving should not constitute more than half of the area between the site frontage and the forward-most building alignment of a dwelling. Driveway width should not exceed 50 percent of the frontage of the site.

2.2.11 Development should seek to preserve and maintain existing mature vegetation, and in particular, vegetation which provides a screening effect between sites shall only be removed or cut back to facilitate the establishment of buildings that otherwise comply with the terms of this Deed..

3. Miscellaneous Provisions

3.1 The Owners shall not grant any lease or licence easement or other right of any nature whatsoever which may give any person the right to possession or control or entry upon the Residential Superlots or residential lots upon any terms whatsoever unless such grant shall be expressed in writing and shall contain as an essential term thereof a covenant by the grantee not to do or omit to do or suffer or permit any other person to do or omit to do any act matter or thing upon the Residential Superlots or residential lots which would constitute a breach of the provisions of this Deed if such act matter or thing were done or omitted to be done by the Owners.

- 3.2 The Council and any employee or agent of the Council authorised by the Council may at any reasonable time enter the Residential Superlots or residential lots for the purpose of:
- 3.2.1 inspecting the Residential Superlots or residential lots and any building or structure thereupon;
 - 3.2.2 exercising any other powers of the Council under this Deed or pursuant to law.
- 3.3 If the Owners are in breach of any provision of this Deed, the Council may, by notice in writing serviced on the Owners, specify the nature of the breach and require the Owners to remedy the breach within such time as may be nominated by the Council in the notice (being not less than twenty eight (28) days from the date of service of the notice) and if the Owners fail so to remedy the breach, the Council or its servants or agents may carry out the requirements of the notice and in doing so may enter and perform any necessary works upon the Residential Superlots or residential lots and recover any costs thereby incurred from the Owners.

Does the council hold details of any development approvals relating to:

- commercial or industrial activity at the land; or
- a change in the use of the land or part of the land (within the meaning of the repealed Development Act 1993 or the Planning, Development and Infrastructure Act 2016)?

No

Description of the nature of the development(s) approved:

Note—

The question relates to information that the council for the area in which the land is situated may hold. If the council answers "YES" to the question, it will provide a description of the nature of each development approved in respect of the land. The purchaser may then obtain further details from the council (on payment of any fee fixed by the council). However, it is expected that the ability to supply further details will vary considerably between councils.

A "YES" answer to paragraph (a) of the question may indicate that a potentially contaminating activity has taken place at the land (see sections 103C and 103H of the Environment Protection Act 1993) and that assessments or remediation of the land may be required at some future time.

It should be noted that—

- the approval of development by a council does not necessarily mean that the development has taken place;*
- the council will not necessarily be able to provide a complete history of all such development that has taken place at the land.*

The information herein is provided pursuant to the Council's obligations under Section 7 of the Land Business (Sales Conveyancing) Act 1994.

Only that information which is required to be provided has been given and that information should not be taken as a representation as to whether or not any other charges or encumbrances affect the subject land.

I, Kellie Parker, Administration Officer of the City of Marion certify that the information provided in these responses is correct.
